NETWORK FINANCE - FINANCE RECRUITMENT SPECIALISTS (ESTABLISHED 1987)

An industry requiring specialist skills deserves specialist recruitment. This is precisely what Network Finance offers, making it a clear leader in this field. Our specialist focus on finance jobs is undoubtedly our single greatest differentiator. The technical expertise developed over our many years of experience grants us an unparalleled understanding of the industries' requirements. It has also allowed us to develop a comprehensive candidate database. We can therefore fulfil all needs far more expediently than a generalist agency.

Our project teams are trained extensively to arm them with in-depth knowledge of the trends and dynamics unique to the finance sector. We also take care to foster relationships with South Africa's foremost banks, corporates and listed companies. This contributes to an understanding of company culture which helps us interpret clients' requirements, and match these with quality candidates. Thanks to our success in doing this, 60% of our placements constitute repeat business.

With its broad infrastructure, Network Finance is able to make national placements.
